

HARSH KUMAR

FULL-STACK / BACKEND ENGINEER

+91-983-768-1295 | hemenderkumar3000@gmail.com | LinkedIn | GitHub

SUMMARY

Computer Science undergraduate and Full-Stack / Backend Developer experienced in building scalable web applications using TypeScript, Node.js, Next.js, PostgreSQL, MongoDB, Prisma, Redis, and Kafka. Built production-style applications featuring role-based authentication, real-time communication, asynchronous processing, cloud infrastructure, and analytics. Strong foundation in backend architecture, databases, REST APIs, and modern web development.

TECHNICAL SKILLS

- **Languages:** C++, JavaScript, TypeScript, Python, SQL
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, Authentication, WebSockets
- **Databases:** PostgreSQL, MongoDB, Prisma, Redis
- **Distributed Systems:** Kafka, Redpanda, Message Queues, Microservices
- **Cloud & DevOps:** AWS (RDS, S3, Cognito, API Gateway, VPC, Amplify), Docker
- **Tools:** Git, GitHub, Postman, Nx, ImageKit

PROJECTS

Multi-Vendor E-Commerce Platform

Tech: Next.js, TypeScript, Node.js, Express.js, MongoDB, Prisma, Kafka, Redis, TensorFlow, ImageKit

- Architected a multi-vendor e-commerce platform with separate buyer, seller, and admin workflows using modular backend services.
- Implemented role-based authentication and authorization using JWT/session-based authentication across protected resources.
- Designed asynchronous event-driven workflows using Kafka/Redpanda and implemented Redis/WebSocket-based real-time communication and user tracking.
- Integrated TensorFlow-based product recommendations to personalize product discovery based on user activity.
- Implemented product media delivery and optimization using ImageKit and built administrative analytics and management workflows.

Project Management Platform

Tech: Next.js, TypeScript, Node.js, PostgreSQL, Prisma, AWS (RDS, S3, Cognito, Amplify, API Gateway, VPC)

- Built a full-stack project management platform supporting Kanban workflows, team collaboration, role-based access, and performance analytics.
- Designed relational data models and backend workflows using PostgreSQL and Prisma for users, projects, tasks, teams, and application operations.
- Implemented secure authentication and authorization using AWS Cognito with protected application resources.
- Integrated Amazon RDS for managed relational storage and Amazon S3 for secure file uploads and object storage.
- Designed cloud infrastructure using API Gateway, VPC, Amplify, RDS, and S3 for scalable application deployment.

EXPERIENCE

Web Development Intern — CodSoft | July 2025 – August 2025

- Completed the assigned Web Development internship program and delivered all Level 3 tasks.
- Applied modern web development practices to build and iterate on functional web application features.

EDUCATION

B.Tech — Computer Science & Engineering | Roorkee Institute of Technology, Roorkee | 2023–2027 (Ongoing)

Class XII: 86.80% | Girish Prasad Memorial College | 2022 **Class X:** 85.67% | Girish Prasad Memorial College | 2020
